Temperature control knob

Turn on the water source and check for water leakage at all connections.

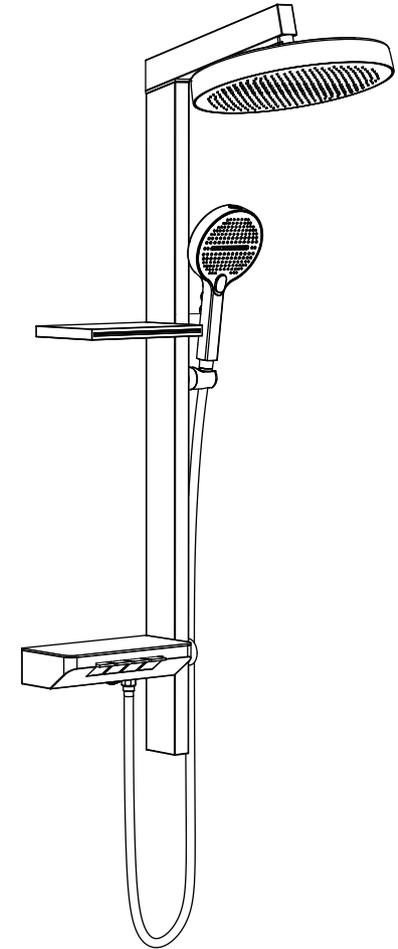

Maintenance

- Please clean the shower frequently or regularly in order to keep the surface of the shower bright and clean.
 - Frequently wash with clean water, dry the shower with a soft cotton cloth.
 - Do not use detergents or nylon brushes containing coarse particles such as scouring powder or polishing powder Sweep to avoid abrasion of the product.
 - Since acid detergent can corrode the coating, it should not be used. If acid washing is made, the tiles and utensils should be fully washed immediately to avoid them flows to the surface of the shower and corrodes the shower.
 - When using, do not pull the shower hose forcefully to prevent the hose from cracking.

- If you need to do a lot of cleaning work, please follow the following procedures
 - Use clean water and rags to remove dirt and scale films on the surface as much as possible.
 - Use any of the following cleaning detergents to remove dirt and scale films: Mild liquid cleaner. Colorless glass cleaner, non-abrasive and completely dissolved powdery cleaner detergents (and mix as instructed) Polishing fluid without abrasion used.
 - After cleaning, please use clean water to remove all the detergent and dry it with a soft cotton cloth.
